

SHIPMENTS FORECAST

SERVICE FOR SUPPLIERS TO THE PAPER INDUSTRY

BROCHURE

SHIPMENTS FORECAST OVERVIEW

The **EMGE Shipments Forecast** is devised specifically for suppliers to the European Paper Industry, including pulp, minerals, chemicals, binders etc.

The service comprises four reports, produced quarterly, which contain forecasts of mill shipments (production) for each paper grade in West Europe. These forecasts draw on the ongoing research and analysis performed by EMGE in the global paper markets.

Each report contains rolling **quarterly forecasts of mill shipments**, growth rate, capacity and operating rates – to provide clients with a valuable, easy to use planning tool. These forecasts can be compared to client sales, budgets etc, for direct analysis of company performance versus paper industry activity.

In addition, each report includes a comprehensive **quarterly review**, which provides commentary and charts on factors influencing the markets, including a range of valuable indicators such as economics, advertising, pulp prices, paper prices, currencies, company profits etc.
